

Mr Harry Drury. In Equator

Carpenter Snake ~~Mossie~~ Mooli } both at
Hawk. Juli. } ^{one} ~~one~~ ~~was~~

Mooli had charge of the stick & had to keep it
swaying from side to side to keep it afloat
^{just as the other sways up head by day.}
He got tired of this & decided to creep away to
the sea to throw it in as that was the only
way he could get rid of it. Accordingly he
crept away like a carpenter snake. But
his aim was noticed & Juli was
sent after him because of his awkwardness
of foot. He caught up to Mooli just as
he was about to throw the stick into
the sea & seized it (where upon Mooli turned
into a carpenter snake). Juli threw the
stick away into the bush which caught
afire & burned for miles miles. He
then became a Hawk. The fire of the
burning bush gave the others the idea
of rubbing them together to make fire
