Q.

To the Curator Perth Museum  
A Sir

I have received a note from you relative to a native "catamaran" and I am now forwarding one to your museum, also in a small box addressed to you, I have forwarded two models that are toys used by native children to play with on the same principle that we ourselves make little sailing boats when we are children.

These little models were made by one of our school children about 14 years of age.

The grass inside the little sticks is where they place their food or anything that they wish to keep dry. I have also enclosed in the box a similar model addressed to Mr. Campbell of the Geologist Department & am advising him of same.

I have the honour to be  
Yours respectfully  
Seymour Dudley.
