Dec. 4th 1911.

The Curator.
Museum.
Perth.

Dr. Sir. In looking through your collections the other afternoon. I was rather surprised to see such a poor assortment of native grinding mill stones etc.

Some years ago I floughed out a stone evidently used by the natives for some such purpose. I will send it along by rail. if you would care to add it to your collection. all I ask is that you express an opinion on its original use. I once thought it was a "medicine stone" as used in South America.

It is only about 4 inches on each angle & 2 1/2 inches thick. would weigh about 4 lb.

W. P. King To hear from you.

Yours O.K.
Arthur Rumble.
