

The Museum Perth  
March 28<sup>th</sup> 1916.

Dear Sir

I beg to forward to you herewith  
particulars concerning the West. weets or  
Kangaroo Rats in the Collection.

This object does not appear to be indigenous  
as white settlers still living in the South  
East of the State (Balladonia) can remember  
its introduction from South Australia.

Specimen No C458 is ornamented. I  
can forward a photograph of same if  
desired for illustration.

Yours faithfully

Keeper of Ethnology

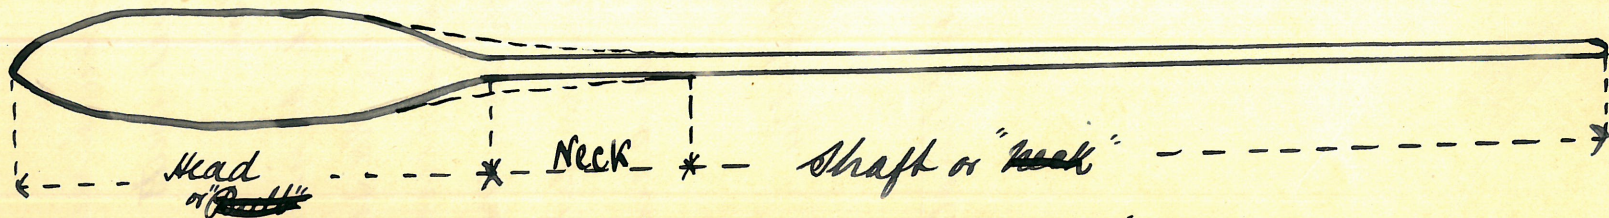

W. D. Campbell Esq

File with  
copy of letter

Museum Number	Donor + Date of donation	Locality Local name	Kind of wood	Weight	Length	Length of Bulb	Dia. of Bulb	Dia. of Shaft
C 458 <sup>*</sup>	W. Beere 17/4/1898	Eucla Dist	Mallee?	4 1/8 oz	19 9/16"	5"-6" <sup>*</sup>	1 1/4"-1 3/8"	3/8"
C 459	do	do	?	3 3/4 oz	29 1/4"	5"-7 1/2" <sup>*</sup>	1 1/4"-1 3/8"	3/8"
5705	Collected by May 1914 W. A. Alexander shaft broken	Balladonia Wöggärrä	?	1 3/4 oz	11 3/8"	4 1/2"-7" <sup>*</sup>	1 1/16"	3/16"
5706	do do head only	do Wöggärrä	?	7/8 oz	—	3 1/4" <sup>*</sup>	7/8"-15/16"	1/4"

\* The Shaft of this specimen has not been straightened

\* The head of these specimens gradually merges into the shaft. I suggest that the space 1" in C 458, 2 1/2" in C 459 + 2 1/2" in 5705 be termed the "neck"
